## Summary

After messing around and learning different stuff, I have acquired hands-on experience with both Python and JavaScript, particularly, NextJS, ReactJS, Typescript, Django, Django Ninja, Flask and many more things that I won't be able to fit here. I have a good understanding and experience of version control and deployments and, not to forget, I have created many N8N automation flows and used AI for different use cases, worked with Supabase, Strapi CMS, different UI libraries(Shadcn, Chakra, AntDesign etc.), also tried app development with Expo and didn't like it.

## Work Experience

### Devkind

SOFTWARE DEVELOPER

- Maintaining and Implementing new features in existing projects.
- Developing full-stack web applications for clients with the help of AI.
- Developing a product for clients by utilizing existing assets related to e-commerce.

🌐 devkind.com.au

Jul.2025 - present

### Devkind

DEVELOPER INTERN

- Contributed with teams to develop projects from requirements gathering to deployment
- Developed and maintained full-stack applications using Next.js, React, Refine framework, Supabase and Strapi CMS
- Built n8n automation workflows for extracting, processing, handling and storing data and business operations
- Implemented e-commerce features including Stripe integration, Authentication (Clerk/Supabase) and checkout flows.
- Successfully handled and delivered multiples projects on my own under supervision.
