## OBJECTIVE

Full-stack engineer with 1+ years of experience, passionate about building scalable, AI-integrated web applications. Seeking a product-focused role to solve complex user problems and learn the design and development of production-grade products.

## EXPERIENCE

<b>Software Developer</b> Devkind	Jul 2025 - Present <i>Melbourne, Victoria, AU (Remote)</i>
<ul style="list-style-type: none"><li>Built a plug-and-play checkout for Swell stores using Cloudflare KV, Easyblocks, and NextJS, featuring a no-code editor for UI customisation.</li><li>Optimised the core checkout logic from 3 steps to 1, reducing friction and increasing completion rates by approximately 35%.</li><li>Delivered 6+ client projects end-to-end, managing design, backend, frontend implementation, and deployment.</li><li>Mentored an intern through code reviews and task delegation to ensure timely and effective task completion.</li></ul>	
<b>Developer Intern</b> Devkind	Mar 2025 - Jun 2025 <i>Melbourne, Victoria, AU (Remote)</i>
<ul style="list-style-type: none"><li>Reworked a legacy website with a modern, sleek design, improving SEO and UX, which directly increased organic traffic, sales leads and decreased paint time from 172 ms to 30 ms.</li><li>Standardised AI usage by creating a database of specialised prompts, reducing API token costs by 30%, and ensuring code consistency.</li><li>Automated marketing workflows using N8N and Slack, saving the team 10+ hours of manual work weekly.</li></ul>	
<b>Full-stack Freelance Developer</b> Samiullah Arif Enterprises SAE	Nov 2024 - Apr 2025 <i>Sukkur, Sindh, PK (Remote)</i>
<ul style="list-style-type: none"><li>Built a custom invoicing system using Django Ninja and NextJS that had processed over 20,000,000 PKR in transactions.</li><li>Iterated on the product based on real-time client feedback to handle different scenarios and 4+ new feature requests.</li></ul>
